CONTRACT FOR SERVICES

WELCOME TO OUR OFFICE! IF YOU HAVE ANY QUESTIONS, PLEASE FEEL FREE TO ASK US. WE HOPE YOUR VISITS AT WORTHINGTON WELLNESS CENTER, INC. WILL BE EDUCATIONAL AND HELPFUL.

Signing this form indicates that you are voluntarily and knowingly undergoing this procedure referred to as **Computerized Electro Dermal Screening (CEDS)**. This term involves the field of quantum physics, which deals with energy fields that you cannot see with the naked eye.

Electro Dermal Screening was discovered by Dr. Reinholt Voll, M.D., of Germany around 1926. This procedure is currently conducted around the world in countries including the United States, Canada, Mexico, Germany, South Africa, Japan, Israel, England, Australia, and New Zealand. A web site is available at www.ihtbio.com.

This procedure is totally non-invasive and involves the application of an electronic probe of 1.5 to 5 volts to measure skin resistance at selected acupuncture sites located on the hands and feet. It can be safely performed on an infant to the elderly person. During the procedure, it is then determined as to which meridians are imbalanced and which natural substances bring balance back to the meridians. The process allows your own body to "talk" to the practitioner.

The procedure is completely safe. The only sensation that is felt is the slight pressure of the probe against the acupuncture site. Twenty-five plus acupuncture sites may be tested. The Federal Drug Administration (FDA) has classified this device as Class Two which means it is information-finding only, much like an EKG.

At no time will there be any implied and/or stated indication for any client to discontinue any medication prescribed by his/her physician(s). At no time will there be any implied and/or stated indication to any client to discontinue care under the direction of any other physician. CEDS is not intended, implied, or stated to take the place of any conventional medical test and/or diagnostic procedure; but CEDS is complementary to these tests and procedures.

This office cannot guarantee complete resolution of all your health concerns, but it has been found that complete client compliance to the suggested natural health care recommendations can result in greater and more consistent changes towards better health. If you, the client, wish to decline participation in this program, you may do so at any time. This office reserves the right to dismiss any client at any time due to poor compliance and/or non-payment. Insurance is not billable at this time for this procedure. I understand that Joyce Baker is a nurse, not a traditional medical doctor.

I have fully read and understand the above information, the elements of informed consent, my responsibilities and rights, and hereby consent to CEDS. Joyce Baker BSN, DiHt lectures and teaches throughout the United States. I consent to the discreet use of my clinical information as needed for study, teaching and research.
